Configuring Thunderbird to work with WMTel.net (Can be used on any version of Windows or MAC)

Step 1: You will need to download thunderbird from Mozilla's website. The link is http://www.mozillamessaging.com/en-US/thunderbird/download/ Now choose the proper download based on your computer's Operating System. Most people will use the top one for Microsoft Windows.

Step 2: Save and Install thunderbird by clicking on the save option, then the install option once it has completed downloading. Just follow through the steps by clicking next until it is finished installing. You can leave the box checked to run Thunderbird.

Step 3: Enter you info below in the Mail Account setup window and click continue. (example shown below)

	Mail Account Setup Your game: John Smith Email address: username@wmeLnet Dassword: Regember password	Your name, as shown to others Cancel	Continue

Step 4: Thunderbird will now try to guess what the servers will be. If successful, it will look exactly the same under "Thunderbird has found the settings for you email account". Click Create Account

Mail A	Account Setup					×
	Your <u>n</u> ame:	John Smith	Your name, as shown to others			
	Emai <u>l</u> address:	username@wmtel.net				
	<u>P</u> assword:	•••••				
		📝 Re <u>m</u> ember password				Start over
	Thunderbird ha	is found the settings for you	ır email accou	nt.		
	Username:	username				Ēdit
	🥃 Incoming:	pop3.wmtel.net	POP	110	None	
	🥃 Outgoing:	smtp.wmtel.net	SMTP	25	None	
	Manual <u>S</u> etup				C <u>a</u> ncel	Create Account

Step 5: Next, a warning will pop-up, simply check the box next to "I understand the risks" and click on **Create Account.** Continue on to the next page...

Mail Account Setup		×
	Warning!	
	Incoming settings: pop3.wmtel.net does not use encryption.	
	Technical Details	
	Outgoing settings: smtp.wmtel.net does not use encryption.	
	Technical Details	
	Thunderbird can allow you to get to your mail using the provided configurations. However, you should contact your administrator or email provider regarding these improper connections. See the Thunderbird FAQ for more information.	
	✓ I <u>understand the risks.</u> Change Settings Create Account	

Step 6: Click OK (exactly as shown below)			
System Integration			
Use Thunderbird as the default client for:			
📝 E-Mail			
Newsgroups			
✓ Feeds			
Allow Windows Search to search messages			
☑ Always perform this check when starting Thunderbird			
OK Cancel			

Step 7: Now, we need to make a setting change so you can send email. Go to the top and click on Tools, then go down and Click on Account Settings (exactly as shown below)

🧿 Inbox - Mozilla Thunderbird 🚽
